Supply of hard coal to public power stations and all coking plants in the Community in 1989

Supply of hard coal to public power stations and all coking plants in the Community in 1989

1. Major consumers account for 259.2 million t hard coal - 82.2% of total supplies

Deliveries of hard coal to public power stations and all coking plants in the Community totalled 259.2 million t in 1989. This means that these two major consumers took up 82.2% of Community hard coal supplies (1988 = 81.5%). The increase in offtake attained 5.7 million t (+2.2%). Whereas supplies to the coking plants at 70.4 million t remained static or even fell slightly (-0.7%) (1988 = 70.9 million t), the power stations accounted for 188.8 million t, thus achieving a growth rate of 6.2 million t (+3.4%) and beating the 1982 record of 188.2 million t.

2. Community share of deliveries: 176.2 million t (68.0%)

176.2 million t (68.0%) out of total hard coal deliveries was Community coal (1988 = 178.5 million t, 70.4%), of which 141.7 million t was consumed by power stations (1988 = 142.2 million t) and 34.5 million t by coking plants (1988 = 36.2 million t).

3. Imports from non-Community countries of steam coal and coking coal :83.1 million t (32.0%)

Imports from non-Community countries of steam coal rose from 40.4 million t in 1988 to 47.2 million t in 1989 (+16.7%). Imports of coking coal rose from 34.7 million t in 1988 to 35.9 in 1989 (+3.6%).

The USA increased its lead as the main supplier of steam coal and coking coal by supplying 38.0 million t (+17.6%) (1988 = 32.3 million t). A long way behind came Australia with 12.8 million t (-20.6%), followed by South Africa with 12.3 million t (+36.1%), Columbia with 7.6 million t (+39.2%) and Poland with 5.3 million t (-22.0%). A breakdown by type of coal shows the USA (14.3 million t), South Africa (12.3 million t) and Columbia (7.6 million t) to be the major supplier of steam coal, whereas the top three suppliers of coking coal were the USA (23.7 million t), Australia (7.7 million t) and Poland (2.0 million t).

4. The situation in the Member States

Almost all Community Member States contributed to the increase in deliveries of steam coal (6.2 million t), and in particular France with 4.8 million t. Only the United Kingdom's deliveries fell sharply (-3.6 million t). On the other hand, there was a slight drop in supplies to most consumers of coking coal, i.e. France, the Federal Republic of Germany and Belgium.
